### INTERESTS

### PROFILE

Background in software engineering, with the main technical area of expertise being JVM based solutions. Throughout my 12 years career, I had a chance to work in many industries, including telecommunications and banking being the major two.

I had the privilege to experience the entire delivery chain from coding, through design, product ownership and finally team management.

I'm a big fan and practitioner of an agile approach to software development, with many years of experience in SCRUM and XP.

*My main career aspiration is to manage and shape great software product delivery, working in a dynamic and client-oriented environment.*

### EXPERIENCE

<div><div>now</div><div>2018</div></div>	<b>Munich   Zooplus AG</b>   Product Owner  Managing the development and maintenance of IT products portfolio for Customer Care business. On a daily basis, I'm working across local business stakeholders, fellow POs and two remote development teams. I am responsible for managing the long-term product roadmap. Filling the respective backlogs with features addressing the business need with a technical solution. My work impacts span three main areas: Customer Care, webshop and warehouse. Main successes of delivering integration with courier providers, transactional plugins for contact processing system Zendesk, and first features for webshop order claiming.
<div><div>2016</div><div>2018</div></div>	<b>Wrocław   Ocado Technology</b>   Technical Team Lead  Leading a team of five developers working on webshops for General Merchandise part of Ocado: Fetch, Fabled and Sizzle. Responsible for a team day to day performance. Close cooperation with Product Owner, coaching and support in both technical and organizational dimensions. Selected successes were: project handover from the UK team, completely new - one-pager checkout, Paypal payment, system monitoring with New Relic.
<div><div>2016</div><div>2012</div></div>	<b>Wrocław   Credit Suisse</b>   IT Project Manager / Team Leader  Worked in two IT Investment Banking departments: Client Technology Solutions and Macro Risk. In my first role, I was focused on running the project team and SCRUM. In Macro Risk, I took over 20+ team and stepped back from technical details focusing on the front to back project delivery. I owned and managed the book of work for global IT systems.
<div><div>2012</div><div>2012</div></div>	<b>Wrocław   Novamedia Innovision</b>   R&D Manager  I held full responsibility for the company's software portfolio. We were developing embedded software for public vehicles, and accompanying web-based management platform. The broad scope of role responsibilities included facing off the client, managing book of work, team and project delivery.
<div><div>2012</div><div>2009</div></div>	<b>Wrocław   Nokia Siemens Networks</b>   R&D Line Manager  I was line managing a development/testing team in Radio Access Department. We worked on software for radio module components. On top of line management, I was acting as a SCRUM Master and team interface with internal and remote clients.
